New Functionalities

- The Training Module has new functionalities:
 - One or more supervisors can be attached to an employee on their Training Log.
 - The process of sending a notification to a supervisor that a training has been completed and a review is needed has been automated.
 - A PDF training report can be downloaded showing a complete training history for each employee.
 - All activities in an LMS Curricula are auto-populated to an employee's training log.
 - A full Training Report can be downloaded as an Excel spreadsheet.

Improvements

- The "Reason for Change" in the Document Management System can be changes at any time before final approval.
- "Limited Users" are allowed to change their own passwords.
- An option has been created to allow Inventory Operators to add documents in the Document tab of the Training Log.
- In order to avoid conflicts with Windows OS, some restriction to file names have been applied to file upload screen (HPrUploadFile).
- A message was added to the Document System to remind users not to use the automatic conversion to PDF if they upload password protected files.
- A change to the internal mechanism for downloading DMS files was made in order to prevent Chrome from preventing downloads or showing a security message.
- The "lockout policy" for multiple incorrect logins was updated.

Fixes

- Under certain condition, when a document was approved and the system wasn't able to create the PDF, the status of the file was locked.
- Materials Nearing Reorder, Materials Requirement Planning, Materials Nearing Retest Date and Materials Nearing Alert had duplicate attachments
- Under certain conditions a usage of material under a step of a BPR was incorrectly displayed.
